NONCITRUS PRODUCTION UP 4 PERCENT

United States fruit growers harvested 11.6 million tons of deciduous fruit in 1975, up 4 percent from the previous year and 6 percent above 1973. The greatest tonnage increases were shown in apples, grapes and apricots. The largest tonnage declines were shown in peaches, figs and tart cherries.

Value of utilized production at 1.8 billion dollars for 19 deciduous fruits decreased 5 percent from 1974. Peaches, apples and apricots led the increase in value while grapes, tart cherries and prunes and plums showed the largest decline.

PRODUCTION OF EDIBLE NUTS AND VALUE UP

Total edible nut production at 490 thousand tons increased 14 percent from 1974 and was 5 percent above 1973. Increases in production were shown in pecans, walnuts and filberts. Almonds were 30,000 tons below last year's record.

All nut crops except almonds and Hawaiian Macadamia nuts had a greater value than 1974. Utilized value of production for 5 edible tree nuts at 308 million dollars was slightly less than 1974.

Noncitrus Fruits and Nuts Annual January 1976

APPLES: The 1975 commercial apple crop utilization was a record high 7.2 billion pounds, 7 percent above the previous high of 6.7 billion pounds utilized in 1969. The 1975 crop was 11 percent more than the 1974 production and 15 percent above the 1973 crop. Utilized production in 1975 was 95 percent of the total apples produced compared with 99 percent of the total crop in 1974. Economic abandonment and excess cullage totaled 397 million pounds in 1975, sharply above the 49 million pounds estimated in 1974. Western States recorded an 18 percent larger crop than in 1974 while Central States were up 15 percent and Eastern States up 2 percent.

Production increases were recorded for all varieties in 1975. The most significant percentage increases were: R.I. Greening, up 54 percent; York Imperial, 30 percent; Northern Spy, 28 percent; Red Delicious, 24 percent and Jonathan, 24 percent.

Red Delicious continued as the leading variety, accounting for 35 percent of the 1975 production. Other leading varieties and percent of total production are: Golden Delicious, 15 percent; McIntosh, 9 percent; Rome Beauty, 8 percent; Jonathan, 6 percent and York Imperial, 5 percent.

APRICOTS: U.S. apricots production at 169,500 tons was 81 percent more than 1974 and 7 percent above 1973. The crop was produced under near normal weather conditions.

AVOCADOS: Production of California avocados in 1974-75 totaled 102,000 tons, 92 percent more than the 53,000 tons produced in the 1973-74 season. The Fuerte crop (fall & winter varieties combined) at 39,300 tons compared with 11,800 tons the previous season. The Hass crop (spring & summer) was 43,500 tons, up sharply from the 27,400 ton crop produced in 1973-74. Florida's 1974-75 avocado crop at 21,900 tons was up 8 percent from the previous year.

BANANAS: The Hawaiian crop is placed at 6.1 million pounds, 8 percent less than 1974 and 16 percent below the 1973 crop. The decline is attributed primarily to a lower yield.

BUSHBERRIES: Washington and Oregon bushberry production totaled 65.2 million pounds, 5 percent more than 1974 and 51 percent above 1973. Cultivated blackberry production totaled 22.0 million pounds down 25 percent from 1974.

Blueberry production in Washington at 4.5 million pounds was 7 percent above 1974. The Boysenberry and Youngberry crops in Oregon at 3.6 million pounds were up 24 percent. Currant production in Washington at 450,000 pounds was up 17 percent. The Oregon Loganberry crop totaled 2.8 million pounds, 53 percent above 1974. Black raspberry production in Washington and Oregon at 2.6 million pounds was 11 percent above 1974. The 1975 Red raspberry crop in the two States totaled 29.4 million pounds, 38 percent above the previous year.

CRANBERRIES: Production in 1975 at 2.1 million barrels was 2 percent below 1974's utilized production but 4 percent above 1973. Massachusetts, one of the major cranberry States, had a 13 percent smaller crop than in 1974 due to an extremely hot period in August with late berries failing to size. Wisconsin's crop was 9 percent above 1974 with good quality and color. Set-aside provisions of the Cranberry Marketing Order were not used in 1975.

DATES: The 1975 California crop totaled 23,700 tons slightly below the 1974 crop but slightly above the 1973 crop.

FIGS: California fig production amounted to 34,950 tons in 1975, 21 percent less than 1974 and 17 percent less than 1973. Quality of the crop was below average. There were 3,150 tons utilized as fresh or canned and 10,600 tons of dried figs which were made from 31,800 tons of fresh equivalent.

GRAPES: The U.S. 1975 grape crop utilization is estimated at a record 4.3 million tons, up 4 percent from 1974 and 3 percent above the crop of two years ago.

California production was up 4 percent from 1974 and was the largest crop since 1965. Grapes produced in California accounted for 90 percent of the 1975 U.S. crop. Harvest of raisin variety grapes, at 2.2 million tons was up 14 percent from a year ago. Output of table varieties at 419,000 tons fell 28 percent. Wine variety production continued to increase and set a new record at 1.3 million tons - an increase of 3 percent over 1974.

Production of grapes in other States totaled 414,420 tons, an increase of 2 percent from 1974. New York's output at 153,000 tons was 14 percent below a year earlier. Washington - the third leading grape State - set a new high in 1975 of 108,500 tons, an increase of 35 percent over 1974. Michigan's tonnage at 55,000 rose 16 percent while Pennsylvania's production fell 9 percent.

SWEET CHERRIES: Production in 1975 totaled 153,610 tons, up 7 percent from 1974 and was just slightly below the 1973 record high of 153,630 tons utilized. California, Oregon and Washington, accounting for about three-fourths of the total, produced 111,800 tons, up 5 percent from 1974.

TART CHERRIES: Total production in 1975 was 145,250 tons, of which 123,070 tons were utilized. The 1975 utilization was 7 percent less than 1974 but 41 percent more than the freeze damaged 1973 crop. The Great Lakes States utilized production of 114,370 tons was 7 percent below the 1974 utilized total. These States accounted for 93 percent of the total utilized with Michigan at 93,000 tons accounting for 74 percent of the total. Set-aside provisions of the Cherry Administrative Board which were invoked in 1975, account for a portion of the cherries produced but not utilized. In addition, approximately 9,800 tons are still held in the Reserve Pool. A very favorable early season crop outlook in Michigan did not completely materialize because of hail, wind and rain late in the growing season.

NECTARINES: California production in 1975 totaled 111,000 tons, 3 percent below the previous year but 30 percent above 1973.

OLIVES: Production in California totaled 65,500 tons, 12 percent more than 1974 but 6 percent less than 1973.

PAPAYAS: The 1975 production of Hawaii papayas amounted to 40.1 million pounds, a record high for the third consecutive year. The crop was 8 percent more than a year earlier and 22 percent above 1973.

PEACHES: The 1975 utilized crop at 2.7 billion pounds was down 3 percent from the previous year but 9 percent above the 1973 crop. The decrease from 1974 is largely attributed to a smaller California clingstone crop. California's clingstone crop, at 1.3 billion pounds, was down 11 percent from 1974 but 14 percent above 1973. Peach production excluding the California clingstone crop, at 1.4 billion pounds, increased 7 percent from a year ago. Georgia, one of the major southern peach States, recorded a production more than double the short 1974 crop.

PEARS: U. S. utilization of pears is estimated at a record high 761,900 tons, 3 percent above 1974 and 5 percent more than 1973. Utilized production in the Pacific Coast States, accounting for 93 percent of the U. S. crop, was up 2 percent from 1974. The 13 percent increase in Washington more than offset the decline in California and Oregon. Bartlett pear production at 527,500 tons increased 6 percent and offset a 9 percent drop in pear varieties other than Bartletts.

PERSIMMONS: The 1975 California production, at 2,100 tons, was 16 percent less than a year earlier, but 8 percent above the 1973 crop.

POMEGRANATES: Production totaled 6,000 tons in California, 2 percent above 1974 and 58 percent above the short 1973 crop.

PRUNES AND PLUMS: Utilized production of prunes and plums in Michigan, Idaho, Washington and Oregon was 69,200 tons, a gain of 3 percent from the previous year and 4 percent above 1973's crop. Michigan's production increased 50 percent over 1974 and offset smaller output in the other three States.

The California plum crop totaled 126,000 tons, 12 percent below the record high crop of 1974 but 30 percent above 1973 production. The California prune crop is placed at 150,000 tons, up 6 percent from last year but 27 percent below the 1973 crop of 205,000 tons.

ALMONDS: California production at 159,000 tons in-shell was 16 percent less than 1974 but was 19 percent above the 1973 crop.

FILBERTS: Utilized production in Washington and Oregon totaled 11,950 tons. This was 78 percent above the short 1974 crop but 2 percent less than in 1973. Harvesting conditions were generally poor.

MACADAMIA NUTS: The 1975 Hawaii crop at 16.8 million pounds was 3 percent above a year earlier and 39 percent above the 1973 crop.

PECANS: The U.S. 1975 pecan crop is estimated at 230.2 million pounds, 68 percent above the short 1974 crop but 17 percent less than the 1973 production. Improved varieties at 114.3 million pounds were up 34 percent from 1974. Native and seedling pecans totaled 115.9 million pounds, 2 1/4 times the 1974 crop.

Above normal rainfall in many areas resulted in higher than usual scab and other disease infestations. Nut dropage was also generally above average. North and South Carolina had no change in total production from 1974, New Mexico was down 24 percent, but all other States registered sharp increases.

WALNUTS: A record 1975 walnut crop totaled 196,200 tons, 25 percent above 1974 and 12 percent above the previous record set in 1973. California production at 195,000 tons was up 26 percent from 1974.

1/ DIFFERENCES BETWEEN TOTAL PRODUCTION AND PRODUCTION UTILIZED ARE CRANBERRIES NOT HARVESTED FOR ECONOMIC REASONS AND EXCESS CULLAGE.

2/ CRANBERRIES PAID FOR BY PROCESSORS AND LOST BECAUSE OF DEHYDRATION AND BERRY BREAKDOWN AFTER DELIVERY.

3/ EQUIVALENT RETURNS AT FIRST DELIVERY POINT, SCREENED BASIS OF UTILIZED PRODUCTION.

4/ SEASON AVERAGE PRICES FOR 1975 ARE NOT AVAILABLE, 1974 PRICES USED TO COMPUTE VALUE.
